

January 9, 1976

some people are not very cleanly and don't clean that and don't clean their bathtubs. I think it is none of the state's business. We are really just talking about public swimming pools and we have had input in the Committee that, at least some localities, some towns felt that the state was misusing this power of inspection, that they were simply paying money and they never saw these people around. So I think what this bill would do is simply that, if the state wants to inspect these public swimming pools, and I think they should, then they also have to carry their costs, their expenses and not just go ahead and charge these towns and maybe not do the job at all. That is the intent of the bill.

SPEAKER: Senator Swigart.

SENATOR SWIGART: Mr. Chairman and colleagues, I want to make two points. One is, in cooperation with Senator Fowler, there was no mention in this bill about any increased charges and so any increases would have to come in a separate bill. So I think we can forget that. Secondly, there won't be the overlapping there used to be in the restaurant business where the state was inspecting but actually coming inside the front door and doing nothing more than greeting the treasurer and getting the \$4. That is done away with because wherever there is a Health Department setup, such as in Omaha, then those will be excluded from the state inspection and so we don't have to worry about it in Omaha because we have a qualified Health Department setup and they will do their inspections. So I think I would rise to support the bill on the basis that it is more likely to get done right out in these smaller places and outskirts if the state is responsible and I think the best way is to let the state pay for those out there. Thank you.

SPEAKER: Senator Cope.

SENATOR COPE: Mr. Chairman and Senators, would somebody explain to me the distinction between Class A and Class B swimming pools, the \$50 charge for Class A and \$25 for Class B. I don't know who to ask, Senator Fowler or...

SPEAKER: Senator Stoney. Senator Fowler, do you wish to close?

SENATOR FOWLER: To Senator Cope's question, I have no idea of what the difference between a Class A and Class B swimming pool is. The bill simply is a question of who should be paying the inspection of these. The communities across the state came in. They felt \$50 was an unfair fee. They cited cases where they did not feel they were getting adequate service from the state but were mandated to pay this fee. It is a question of where the \$9,000 should be paid. As Senator Barnett muttered to me, it is going to come out of the taxpayer's pocket anyway. The question is, should it be collected by the cities and passed up to the state or just put by the state into the money. If people had more questions, I am sure they could talk to the local communities, their
